

$$\left\{ \begin{array}{l} \text{front} = 1 \quad \text{rear} = 0 \\ \text{front} = 2 \quad \text{rear} = 1 \\ \text{front} = 3 \quad \text{rear} = 2 \\ \text{front} = 4 \quad \text{rear} = 3 \end{array} \right.$$

$$\text{front} == (\text{rear} + 1)$$

$$0 == (4 + 1) \quad \text{✗}$$

$$\text{front} = (\text{rear} + 1) \% \text{SIZE}$$

$$0 == (4 + 1) \% 5$$

$$0 == 0$$

Enqueue:

- 1) Check if queue is not full
- 2) Increment rear as
Rear = (rear + 1) + SIZE
- 3) Add element at rear position
- 4) If front == -1, make front = 0

Dequeue :

Check if Queue is not empty.

Increment front .

If front is 4 and rear is 0

to delete the rear position, we cannot increment front as front ++ Will be index 5 but we want to delete index 0;

So,

Front = front + 1 % SIZE

If deleting the last element in queue

If(front == rear)

Front = rear = -1

Queue Empty condition

If(rear == -1) queue is empty

Queue Full condition :

When Queue is full,

Rear = 0 front 1

Rear = 1, front = 2

Rear = 2 front = 3

Rear = 3 front = 4

rear = 4, front = 0

This means,

Front == rear + 1

But when rear = 4 front = 0

0 == 4 + 1 does not satisfy the above condition

So the queue full condition can be

Front == (rear + 1) % SIZE

0 == (4 + 1) % 5

0 == 5 % 5

0 == 0

Option 2:

If rear == SIZE - 1

Rear = 0;

Else

Rear++;

$$\text{rear} = \text{rear} + 1$$

$$\text{rear} = (\text{rear} + 1) \% \text{SIZE}$$

$$\text{rear} = (-1 + 1) \% 5 \rightarrow 0 \% 5 = 0$$

$$(0 + 1) \% 5 \rightarrow 1 \% 5 \rightarrow 1$$

$$(1 + 1) \% 5 \rightarrow 2 \% 5 \rightarrow 2$$

$$(2 + 1) \% 5 \rightarrow 3 \% 5 \rightarrow 3$$

$$(3 + 1) \% 5 \rightarrow 4 \% 5 \rightarrow 4$$

$$\text{rear} = (4 + 1) \% 5 \rightarrow 5 \% 5 \rightarrow 0$$

$$\text{front} ++$$

$$\text{front} = \text{front} + 1$$

$$\text{front} = (\text{front} + 1) \% \text{SIZE}$$

$$(1 + 1) \% 5 \rightarrow 2 \% 5 \rightarrow 2$$

$$= (2 + 1) \% 5 \rightarrow 3 \% 5 \rightarrow 3$$

$$= (3 + 1) \% 5 \rightarrow 4 \% 5 \rightarrow 4$$

$$\text{front} = (4 + 1) \% 5 \rightarrow 5 \% 5 \rightarrow 0$$
