 $= 1$

Control Flow structures

1. Decision control

2. Selection control

3. Loop control

4. Jump

-- if else

-- switch case

-- while, for, do while

-- goto, break, continue, return

```
if(condition)
{
    // block of statements
}
```

if condition is true
then block of statements will be executed

```
if(condition)
{
    // block 1
}
else
{
    // block 2
}
```

if condition is true
then block 1 will be executed
if condition is false
then block 2 will be executed
