

2) If list contains only 1 node

```

If(head->next == NULL)
{
    Free(head)
    Head = NULL;
}
  
```

```

While(trav->next->next != NULL) to traverse till 2nd last node
{
    Trav = trav->next;
}
Free(trav->next)
Trav->next = NULL;
  
```

100 → 200 → 300
 200 → 300 → 400
 300 → 400 → NULL.
